Allowable Subject Matter

Claims 1-24 are allowed.

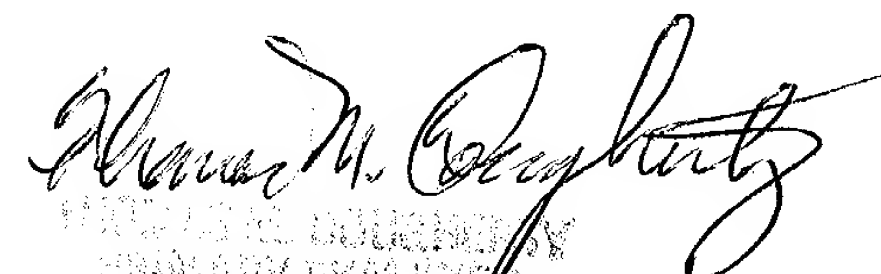

The following is an examiner's statement of reasons for allowance: Note that JP 10-233645 has the same Japanese application number as the Fujimoto ('433) reference. However said reference does not teach elimination of a transverse mode wave or address such. Additionally by sight, it appears that the metallization ratio of '433 is around 1, since the electrode width and the electrode spacing are identical. As the prior art does not teach a relationship between the metallization ratio and the normalized thin film thickness such that a ripple caused by a transversal mode wave is about 0.5 dB or less, the application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Direct inquiry concerning this action to Examiner Dougherty at (703) 308-1628.
